

CyberArk Security Bulletin CA23-20

Elevation of privilege due to configuration files tampering

🕒 Jul 5, 2023 · Knowledge Article

Article Number

000031746

Title

CyberArk Security Bulletin CA23-20

Details

CA23-20

Issued: July 5, 2023

Updated: N/A

Version: 1.0

Severity: High

Score: CVSS 7.0

Third Party Publication / CVE: N/A

Impact: Elevation of privilege due to configuration files tampering

Affected products and versions:

Product*	Version(s)**	Additional Information
EPM SaaS Windows agents	All agents prior to 23.3	All product subsets are affected

* This Security Bulletin applies only to the listed affected products. If this issue also affects another CyberArk product, it will be addressed in a separate Security Bulletin.

** Relates only to versions that are within their development life cycle. Refer to our [End of Life policy \(https://docs.cyberark.com/Product-Doc/OnlineHelp/EOL/en/Content/End-Of-LifePolicy.htm\)](https://docs.cyberark.com/Product-Doc/OnlineHelp/EOL/en/Content/End-Of-LifePolicy.htm) for details.

Resolution:

Follow the instructions in the [online documentation \(https://www.cyberark.com/EPM-SAAS-Agent-Latest-Doc\)](https://www.cyberark.com/EPM-SAAS-Agent-Latest-Doc) to upgrade to the latest version.
