**Severity:** High

**Score:** CVSS 7.8

**Third Party Publication / CVE:** N/A

**Impact:** An attacker could escalate privileges leveraging OPAG for Windows or Windows OS control panel.

### Affected products and versions:

Product*	Version(s)**	Additional Information
Endpoint Privilege Manager	All EPM SaaS Windows agents prior to version 23.10	N/A

\* This Security Bulletin applies only to the listed affected products. If this issue also affects another CyberArk product, it will be addressed in a separate Security Bulletin.

\*\* Relates only to versions that are within their development life cycle. Refer to our [End of Life policy \(https://docs.cyberark.com/Product-Doc/OnlineHelp/EOL/en/Content/End-Of-LifePolicy.htm\)](https://docs.cyberark.com/Product-Doc/OnlineHelp/EOL/en/Content/End-Of-LifePolicy.htm) for details.

### Resolution:

Follow the instructions in the [online documentation \(https://docs.cyberark.com/EPM/Latest/en/Content/Installation/AgentInstallation.htm\)](https://docs.cyberark.com/EPM/Latest/en/Content/Installation/AgentInstallation.htm) to upgrade the EPM Windows agent to version 23.10 or later.

### Temporary mitigation:

There is no temporary mitigation available for this security bulletin.

### Exploited in the wild in a CyberArk environment:

Not to the best of CyberArk's knowledge.

### Technical FAQ

Where can I see the changes done in newer versions?
